Subject: RE: Ag MMs in OR CZARA package

Roberta,

Thanks for the suggestions. I will take a look at them today and get back with you on options. I know the Ag issue will be a discussion topic at the next managers meeting.

Subject: Ag MMs in OR CZARA package

Alan,
Some suggestions to gently strengthened what we say about ag in the findings document. Would NOAA even agree to these?

Findings Document

- 1) p. 1, 3rd par. We should say something stronger than there will be an opportunity to comment on ag MMs "at a later date". What trigger would compel that opportunity—after the state submits something, within a year? Otherwise it sounds like ag goes into an abyss.
- 2) p. 1, 3rd par. Needs to be first signal of our unhappiness with the implementation of the ag MMs.
- 3) p. 2, 1st par. Need to say something again about ag, i.e. we still haven't made a decision about the approvability of the ag MM—just so all the outstanding MMs are addressed in the same paragraph.
- 4) p. 2, last sent. Add "including agriculture management measures".
